

# Study of Memory in Children with Typical Development

Researchers are seeking typically developing children for a study investigating the use of a new computerized memory assessment

## Participants must:

- Be between the ages of 3-6 years old
- Have typical development (no diagnosis of a learning or developmental disability)
- Speak English

The Drexel University Institutional Review Board has approved this study

Participants will be compensated \$40 for each visit. Participation involves 3-4 visits.

This research is conducted by a researcher who is a member of Drexel University.
